- Postel-Vinay 1997 and Fontaine 1997: credit markets were organised as a network system
- operationalisation:
 - ✗ organisation (Jansen)
 - ✗ values and rules (Fukuyama; Putman)
 - ✗ reduction of complexity (Granovetter; Jansen; Luhmann)
 - ✗ trust (Coleman; Luhmann)
 - ✗ social capital (Bourdieu; Coleman; Lin)
 - ✗ exchange of resources (Luhmann)
- **credit**
- New Institutional Economics: markets are networks (Wischermann); embeddeness (Granovetter)
- Historical network research is supplemented by cultural history (Berghoff; Grabas)

Vita

- * 1681 Magdeburg, † 1765 Hamburg
- grammar school in Magdeburg, Zellerfeld and Hildesheim, speaks six languages
- studied law in Leipzig, private music lessons and autodidactical organology
- court composer in Sorau and Eisenach
- 1712 music director in Frankfurt/Main
- 1721 *Cantor Iohannei*, music and opera director in Hamburg
- 1737/38 journey to Paris

Oeuvre

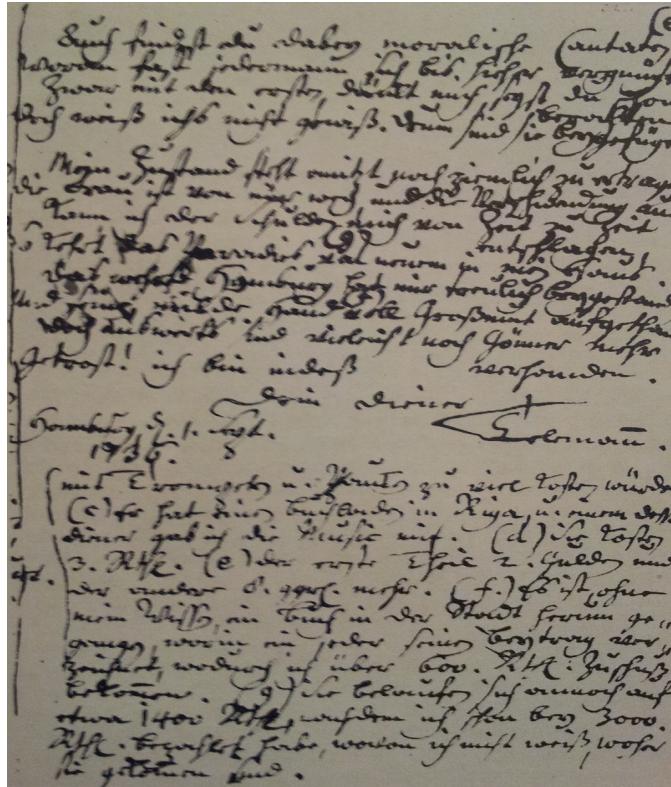

- stylistic eclecticist with french, italian and slavic influences
- cantable tunes, tone paintings, extraordinary harmony
- TWV listed about 3.500 works, half of them church cantatas
- throughout the end of the 20th century he was recognised as an inferior mass composer
- worked with important librettists (Gottsched, Klopstock, König; used the German language (Neumeister))
- wrote *essercizii musici*
- prints were self-published

„Music of the future“ I

- actor network theory (Latour)
- transfer of the documents via PDF OCR/HRT with AbbyyFinereader to searchable corpora (text mining); subsequent processing via visualisation, new source for names and locations in the network = network of musicians
 - HNR2.0?!
 - 1. HNR1.0 beta-version
 - 2. HNR1.0 alpha-version
 - 3. Project A: ambitions
 - 4. Project A: reality
 - 5. HNR2.0 beta
 - 6. Project B: an idea
 - 7. Project B: the alpha version**
 - 8. Conclusion and perspectives
- transfer of the sheet music (PDF) via PDF OCR and Sibelius in searchable corpora; subsequent processing via chord labeling for exploring harmonic structures (MIR) (Konz/Müller/Kleinertz 2013), comparison with the scores of (other) composers = network of music

What can HNR 2.0 provide?

- searchable digital corpora (big data)
- automatical extraction and production of networks = new possibilities of explanation and valorisation
- requirement: easily operated software
- problems: calculations, time
