Chapter 7

Sacred Space in Uyghur Buddhism

Jens Wilkens

1 Introduction

Buddhism became the major cultural driving force among the Uyghurs after it began to spread in earnest around the turn of the first millennium C.E. It affected all arenas of cultural expression, such as architecture, visual arts, literature, poetry, and so on. Sacred space in Uyghur Buddhism is a topic which has not been researched in a systematic fashion so far, although some important points have been touched upon in previous research. When dealing with this issue, several key aspects are to be examined without reference to the complex discussion concerning the concept of ‘the holy’ or ‘the sacred’ in Religious Studies. A highly important issue connected with the topic is certainly pilgrimage, but as Simone-Christiane Raschmann’s article “Pilgrims in Old Uyghur Inscriptions: A Glimpse behind their Records” (see Chapter 8 in this volume) is dealing with it, I refrain from discussing this most significant aspect of sacred space viewed from the angle of religious practice. While art historical and archaeological questions immediately come to mind, I will confine this investigation to a perusal of Old Uyghur texts, due to a lack of sufficient expertise in the aforementioned domains. A thorough investigation of the issue would be best accomplished by a team of specialists from those different fields. A combination of archaeological methods and philological expertise, for instance, has led Takao Moriyasu to discover the ‘Manichaean layer’ beneath a ‘Buddhist

1 I would like to thank Yukiyo Kasai and Kirill Solonin for their remarks on my paper. All translations from primary sources are my own. The references are always to the Old Uyghur original in the text editions. A subscript number 2 in a translation denotes a hendiadys.

3 For example, the concept of the two orders—a spatial model of Buddhist governance which distinguishes between an inner (i.e. religious) and an outer (i.e. political) sphere. See Zieme, “The West Uigur Kingdom,” 6–10.
layer’ in the well-known cave temples of Bezeklik near Turfan. This state of affairs is described metaphorically by Kim Knott as an example of ‘place as palimpsest.’

A further line of enquiry would be whether the caves commissioned or executed by Uyghurs in the Turfan area, at Dunhuang (敦煌) or elsewhere can be identified as specimens of sacred space. It is worth mentioning in passing that the paintings in some caves in Dunhuang reflect the cult of the book among the Uyghurs. They are connected with the Gañḍavyūhasūtra, the final part of the Avataṃsakasūtra, in the case of the Mogao Cave B 464, while other inscriptions of this grotto refer in cartouches to the Suvarṇaprabhāśasūtra (a section on the ten bhūmis). Peter Zieme has discovered a close connection between the paintings of this grotto and the texts accompanying them. In the case of this particular cave, artistic expression follows the patterns laid out by the basic texts.

As one would expect, the holy places of Buddhism in India are—as in other Buddhist traditions—highly significant in Uyghur Buddhism, and most of them are connected with the bodily presence of the Buddha; that is, in the form of relics or in traces left behind such as footprints, the mark of his shadow and so on. This ‘grid’ is the religious grounding for a transnational religion in the ‘diasporic space’ or—as it was put recently—in the Buddhist ‘cosmopolis.’

7 Zieme, “Paul Pelliot,” 429.
Rich material is found mainly in translated works such as in the Old Uyghur version of the biography of the Buddhist pilgrim and eminent monk and translator Xuanzang (600/602–664, 玄奘). The translation can be roughly dated to the first half of the 11th century. In the fifth chapter, especially, places where the Buddha trod are mentioned, for instance, when the Tripiṭaka master sets out for Kauśāmbī to visit the Ghoṣilārāma Monastery. Concerning the terminology applied here, we find 'holy place' (OU kutlug yer oron) for this particular monastery. Xuanzang bowed here to the remains of the ladder by which the Buddha descended in Sāṃkāśya while performing the devāvatāraṇa miracle. The learned masters of Nālandā try to persuade Xuanzang to stay in India by referring to the traces the Buddha left behind before he entered nirvāṇa. One Old Uyghur text admonishes the believers to revere holy places in India that were connected with Buddha’s life. This Caityastotra is a part of the introductory portion of the Altun Yaruk Sudur, the Old Uyghur version of the Suvannaprabhāsasūtra—the Tibetan version of which has survived as well. Obviously, as a block-printed edition shows, the work, which has no known exact parallel in any other Caityastotra text, was “also transmitted as a separate work among the Uigurs.” It is a praise of the eight caitya. Another Uyghur text on caitya veneration was made available to the public by Peter Zieme in 2007. No parallel in any other language has come up so far and there are some peculiar details mentioned which are unique to the Old Uyghur text. Only two leaves have been identified which deal with the second and fourth caitya of the traditional set of eight; that is, respectively, the commemoration of the awakening and defeat of Māra at Uruvilvā and the Buddha's visit to his

---

11 The full title in Old Uyghur is bodis(a)t(a)v taito samtso ačarining yorınuk uktnmak atl(t)g tse-en-čiun tegmā kavi nom bitig [Kāvya Text], Named Ci-en-zhuan with the title “Biography of the Bodhisattva and Tripiṭaka Master of the Great Tang Dynasty”.
13 Dietz, Ölmез, and Röhrborn, Xuanzang-Biographie v, 154 (line 1327).
14 Ibid., 155 (lines 1331–1335).
15 Ibid., 43 (lines 0079–0085).
17 Although it states in the colophon that the Old Uyghur translation by a certain Amoghaśrī (d.u.) is based on a Sanskrit original, it appears to be at least partly modeled after the Tibetan version. See Maue and Röhrborn, “Ein Caityastotra,” 289.
19 Zieme, “Caitya Veneration.”
mother in the Trāyastriṃśa Heaven, starting in Sāṃkāśya. The title of the work is caitti (i.e. Skt. Caitya). In the case of both significant events, the notion of sacred space is combined with a detailed dating, which can be interpreted as a particular, auspicious moment. In an avadāna text interspersed with poetical parts in strophic alliteration, some epithets of the Jetavana Monastery (OU četavan säŋräm) are enumerated; one of which is that it is “an exquisite subhūmi location” (OU üdrülmiš säčilmüş subum oronluk), which is to say, ‘an auspicious place.’ The Uyghurs apparently had a specific Indic terminology at their command to describe sacred space, while in this case, the term subhūmi is uncommon in Sanskrit. The description of the conditions of Buddha’s deeds in Śrāvastī, ruled by King Prasenajit, and of the position of saṃgha and laymen obviously serves as a model for the West Uyghur Kingdom (mid-9th c. to 13th c.) in this text.

In vyākaraṇas it is possible not only to link persons of the past—often people associated in one way or another with different Buddhas—with high ranking Uyghur noble men and women but also to forge a symbolic connection between holy places in India and in the Uyghur realm, especially with Kočo. In one text edited by Masahiro Shōgaito, this is especially conspicuous. A diagnosis of the present situation is given, speaking of a time of degeneration, depravity and impurity, in which the Uyghur nobility tirelessly works to rebuild a thriving Buddhist community. They are even called the ‘charisma of the realm of Kočo’ (OU kočo ulušnuŋ kuṭı kıvı), a term reminiscent of the protective deities guarding the land of the Uyghurs. The alleviation of the woes of the present is supposed to finally lead the people to be reborn here on earth, when Maitreya will attain Buddhahood, in order to receive the prophecy for their own bodhi from him. In one Uyghur text, Maitreya’s descent is located

20 Orthography normalised here.
23 Ibid., 96 (line 317).
24 We know from a Manichaean text that the Uyghurs thought that the city of Kočo (Chin. Gaochang) was guarded by twenty-two protective spirits. See M 111, 40 (text no. 23, verso lines 6–7). In Buddhist texts, protective deities guarding the house or the palace of the king are mentioned several times (references in BT XXXVII, 501, commentary to lines 05294–05296). In the introductory chapter of the Maitrisimit, the protective spirit of the realm of Kočo is mentioned together with pan-Indian deities. See Jens P. Laut, “Gedanken zum alttürkischen Stabreim,” in Splitter aus der Gegend von Turfan: Festschrift für Peter Zieme, ed. Mehmet Ölmez and Simone-Christiane Raschmann (Istanbul, Berlin: Ölmez, 2002), 134–135.
precisely in a certain village near a certain city in China,\textsuperscript{25} while it is usually expected to occur in Ketumati (present-day Varanasi in India).

2 Terminological Observations

When discussing sacred space in Uyghur Buddhism, some terminological observations might be useful. If we look at the Old Uyghur texts, three words come to mind when space is described as holy, symbolically charged or out of the ordinary. The first one is \textit{korıg} or \textit{korıglıg}, originally denoting an enclosed space which is imbued with a quality that can be described as ‘taboo’ in the wider sense of the term, not unlike the Latin \textit{sanctum}. It survives in some modern Turkic languages.\textsuperscript{26} In Old Uyghur Buddhist texts, both words are only used with reference to tabooed women or girls, especially those living in the women’s quarters of a palace. The connotation ‘private property of chiefs’ is present in Karakhanidic Turkic. The word is adopted in Mongolian too, where it can refer to any place bearing a taboo; for instance, the burial ground of the ruler\textsuperscript{27} or an ‘inviolate grove’\textsuperscript{28}. It is not altogether certain whether the word had this specific connotation in Old Turkic as well. As far as I can see, it is not present in Old Uyghur texts edited so far. While the usual word for ‘protect’ is \textit{küzäd-}–\textit{küzät-} in Old Uyghur, occasionally \textit{korı—} the etymon of \textit{korıg}—is applied. In one text, we find this phrase: “by protecting the Buddhist religion which is called ‘good’ from outside harm and dangers.”\textsuperscript{29} We can clearly detect a spatial

\textsuperscript{26} von Gabain, “Maitreya-Text,” 233.
\textsuperscript{27} “To be sure, as Pelliot observed, a \textit{qoruq} was not necessarily an actual tomb-site in the Mongol age; the term could refer to any forbidden precinct, and as Bartol’d observed, the term was not restricted to ‘topography’ in its application: the name of a deceased khan, which was not to be used or spoken for three generations, is spoken of as a \textit{qoruq}, i. e., ‘taboo,’ by Rašid ad-Dīn, and the term \textit{qoruğuč} applied to the guardians of the royal tomb-sites was also used for guardians of the royal harem.” Devin DeWeese, Islamization and Native Religion in the Golden Horde: Baba Tükles and Conversion to Islam in Historical and Epic Tradition (University Park, Pennsylvania: The Pennsylvania State University Press, 1994), 183. Note that \textit{qoruq} is not found in classical Mongolian where we have \textit{qoriɣ}, \textit{qoriya(n)} and \textit{qoruy-a}.
\textsuperscript{28} DeWeese, Islamization and Native Religion, 183.
model here. The good (i.e. Buddhism), being in the centre, is to be protected from evil coming from outside.

The second word, the adjective \textit{idok}, ‘holy,’ can refer to a place—for instance, to the \textit{bodhimaṇḍa}\(^{30}\) or a \textit{caitya}\(^{31}\)—but also to persons as ‘holy one(s),’ thus operating as a noun. It may even denote deceased persons; for example, in the sentence “May our mother and father, the holy ones (i.e. the deceased ones) be reborn above in the Tuṣita (heaven).”\(^{32}\) Etymologically, the word is derived from the verb ‘to send’ (OT \textit{id-}), and according to the dictionary by Gerard Clauson, means “sent, i.e. dedicated, to God.”\(^{33}\) Originally, according to Maḥmūd al-Kāšğiiri’s \textit{Dīwān Luğāt at-Turk} [Compendium of the Turkic Dialects] (completed 1077), the word refers to an “animal which is set free […]; its back is not loaded nor its udders milked nor its fleece shorn because of a vow incumbent on its owner.”\(^{34}\) Although this practice is not found in the Old Uyghur texts so far, it is still known among some modern Turkic speaking peoples as well as among the Mongols.\(^{35}\) The category of the sacred is thus connected with the notion of space (away from the deictic centre) and, originally—as is surmised—a rite of passage.\(^{36}\) The sacred belongs to the outside and is kept at bay from the social world. The title of the ruler of the West Uyghur Kingdom was \textit{idok kut} (lit. Holy Charisma), a combination of two terms essential to the

\(^{30}\) Cf. the following quote from a poem: “at this holy \textit{z bodhimaṇḍa}” (OU \textit{adınčıg idok bo tavčolug oronta}), quoted after BT XIII, 106 (text no. 155).

\(^{31}\) BT XI, 71 (line 1037).

\(^{34}\) Translation according to Clauson, \textit{Etymological Dictionary}, 46b. Marcel Erdal has his reservations regarding this etymology of \textit{idok}: “We cannot, at present, exclude the possibility that Kāšğiiri got this idea from the meaning of \textit{idma yılkı}, which he documents with the meaning ‘an animal which is allowed to go free.’” See Marcel Erdal, \textit{Old Turkic Word Formation: A Functional Approach to the Lexicon}, vol. 1 (Wiesbaden: Harrassowitz, 1991), 233.

study of concepts of the holy and the sacred among the Uyghurs. The ideas about *kut*—the third word to be examined briefly here—were still important after the conversion to Manichaeism and later to Buddhism. In Turkic, *kut* is a multifaceted term with a wide range of meanings; for example, ‘royal charisma,’ ‘good fortune,’ ‘majesty,’ ‘salvation,’ ‘aim of salvation,’ ‘rank,’ ‘blessing,’ ‘grace,’ ‘merit,’ ‘protective spirit,’ ‘soul,’ ‘vow,’ ‘element,’ ‘quality,’ and so forth. Persons and places can be the seat of *kut*—imagined as a kind of substance and coming from above—which makes them special in a religious sense. In Uyghur Buddhism, *kut* became conflated with the concept of *puṇya* (OU *buyan*). The latter not only bears the usual meaning of ‘merit’ but also ‘good fortune,’ ‘grace,’ ‘majesty,’ and so on when used in synonym compounds with *kut*. Just like the amount of *kut* in heaven, the store of *puṇya* which can be dedicated to others is sometimes imagined as residing in heaven above.

I would argue that in the royal title, the horizontal aspect of the holy (OU *ıdok*) is combined with the vertical aspect (OU *kut*). A striking ‘survival’ of the pre-Buddhist and pre-Manichaean conception of *kut* is found in two Buddhist texts edited by Kōgi Kudara and Juten Oda respectively. Both are translations from Chinese. In the first one, a Uyghur version of the *Taishan jing* 太山經 [*sūtra of Mount Tai*], we find: “his lifespan will be long, his good fortune (OU *kut*) thick” (OU özi uzun kuti kalın bolgay). And in the second text, the *Säkiz Yükmäk*, a translation from the *Bayang jing* 八陽經 [*sūtra of the Eight Principles*]: “his lifespan will be long, his good fortune (OU *kut*) will be thick”.

---

38 On the Turks’ ideas about *kut*, see Róna-Tas, “Materialien,” 40.

39 Ibid., 41.

40 BT XXXVIII, 168 (text Gb27).

41 Róna-Tas, “Materialien,” 42, says that the ruler is the *kut* itself.

42 The Chinese title is reconstructed after the OU title *taishanke*.

44 The full title of this text is usually given as *Foshuo tiandi bayang shenzhou jing* 佛說天地八陽神呪經 [*mantra-sūtra of the Eight Principles of Heaven and Earth as Spoken by the Buddha*].

We can compare the small Karabalgasun Inscription written a few decades after the conversion to Manichaeism, where the *kut* of the ruler is said to have become ‘thin’ (OT *yuyka*) in the blue heaven. This idea is certainly pre-Manichaean. In another translated text, the ninth chapter of the *Biography of Xuanzang*, *kut* is said to have settled down (i.e. from above) on the Anfumen (安福門) street, originally the city gate, in Chang'an (長安, modern Xi'an 西安). Thus the ideas about *kut* form a pre-Buddhist and pre-Manichaean layer within Uyghur culture. As in the instance in the *Biography of Xuanzang* quoted at the beginning of the paper, a place can be imbied with *kut*. The term ‘the holy realm of Kočo’ (OU *kutlug kočo uluš*) can be found within the texts. The winter capital of the Uyghurs, Kočo, seems to be the focus of the whole realm, or even identical with it. The holiness of a whole city is a concept found in another context. In a fragment of a text which is probably part of a historical elaboration, there is a description of how a ruined city called *ordo uluš*—probably to be understood as ‘residence’—was

---

46 Quoted after Róna-Tas, “Materialien,” 41, where it is stated correctly that the inscription reflects the old ideas about *kut* even though it was written after the conversion to Manichaism. As the inscription belongs to the East Uyghur Khaganate (ca. 744–843), it has to be surmised that the conception of *kut* was similar to the belief expressed in the Old Turkic inscriptions of the Orkhon Valley.

47 Hakan Aydemir, *Die alttürkische Xuanzang-Biographie IX: Nach der Handschrift von Paris, Peking und St. Petersburg sowie nach dem Transkript von Annemarie v. Gabain ediert, übersetzt und kommentiert*, vol. 1 (Wiesbaden: Harrassowitz, 2013), 108, (line 582). Cf. also ibid., 110 (line 599). Further attestations in the 7th chapter are discussed in the commentary to the first passage in Aydemir, *Xuanzang-Biographie IX*, vol. 2, 321, where it is rightly stated that the translator of the ninth chapter misunderstood the syntax because *kut ornamı̇ş* (‘[where] the divine fortune has descended’) should refer to the gate and not the street. Kirill Solonin points out to me that in both cases the Old Uyghur translation differs from the Chinese original because instead of an equivalent for *kut*, the emperor is mentioned (personal communication).

rebuilt. In one line it is called ‘divine city’ (OU t(ä)ŋri balık). There is also a reference to ‘heavenly winter quarters’ (OU t(ä)ŋridäm kıšklärä). The identity of this ruined city is not altogether certain.

3 Physical Space

After the Uyghurs had to leave their original homeland in Mongolia and settled along the northern rim of the Tarim Basin during the middle of the 9th century, they had to face new environmental and cultural conditions. Although some Uyghurs were already living along the northern rim of the Tarim Basin before the demise of the East Uyghur Kaganate (ca. 744–840) in Mongolia, the major part of the Uyghur populace entered the world of the small oases only in the 9th century. We can safely assume that their perception of space underwent important changes at that time. As Michael C. Brose points out:

By the eleventh century the Uyghurs had themselves become Tarim Basin indigenes whose kingdom controlled the area, and whose identity was shaped by their ancient imperial history and their immediate sociocultural context.

Occasionally the Uyghurs reflected on their surroundings in their writings. I would like to mention briefly a text in strophical alliteration known as the ‘Jade Empress,’ first edited by Kudara in 2001 and re-edited by Abdurishid Yakup in 2014. Additional remarks were made by Peter Zieme in two articles.

---

51 Zieme, “Ordo Uluš,” 257 (line 8).
published on academia.edu in the summer of 2015, in which he introduced newly identified fragments and also some important new readings. The spirit named the Jade Empress (OU kaš hatun) is characterised as a descendant of the Nāga Vāsuki who has her residence “in the valley of Karakočo” (OU kara kočo özäkintä) “with its banks rich in jade” (OU kašlıg kıdıglıg). It is explicitly stated in the text that the Uyghurs call her kaš hatun, the Jade Empress. Although one text mentions a nun called kaš hatun from Toyok, the legendary creature in the poem simply cannot be a human being. The references to mythology are too explicit. The poem reflects the Uyghurs’ perception of their own landscape with kaš hatun as a beneficent entity who provides water in an arid region. The newly identified text seems to point to a use of the poem in the context of rain magic.

4 A Uyghur Approach to Sacred Space?

Taking the imagery of the poem of the Jade Empress as a starting point, one is tempted to ask whether there is a special Uyghur way of conceiving sacred space. In order to give an answer to this question, one would be well advised to investigate those sources which are most likely to be original Uyghur compositions; that is, poems, colophons, inscriptions and letters. The literary genre can be somewhat blurred at times because colophons or inscriptions can be written in strophic alliteration, the typical feature of Altaic poetry. There is one particular poem in sixteen lines with a kind of chorus after each stanza, which praises a quiet and secluded monastery and the nature surrounding it. The landscape and vegetation is typical of the arid and mountainous regions of the Tarim Basin. A river is always of vital importance for the cave monasteries in

59 BT XIII, 138–139 (text no. 27; newly identified in Zieme, “Weitere Notizen”).
60 And there are Uyghur versifications of texts in donor languages such as Chinese or Sanskrit.
this area while caves are also an essential part of the pre-Buddhist religion of the ancient Turks. 62 Running water as well as dense forests and foaming lakes add to the picture represented in the Buddhist poem, too. Only in such a place would one be able to control one’s senses and enjoy in complete solitude the pleasure of the dharma, as the text states. 63 It is remarkable that the author depicts the landscape as something enjoyable, with an inherent aesthetic quality, and a complement to the benefits of meditation.

But not only monastic life is depicted in the religious texts. In one composition traditionally called the Harvest Blessing, 64 there is a very positive description of agricultural activities. 65 The backdrop of this text is Buddhist, but with a very specific local content. There is a second Harvest Blessing 66 in which the god Dhanyadeva is given ritual oblations. This deity is mentioned in the first Harvest Blessing too. In the Maitrisimit we find the native Uyghur term tarıg täŋri, God of Cereals, 67 and it is highly likely that this name refers to the same deity. In the second Harvest Blessing, offerings to Dhanyadeva are supposed to please him so that he procures rich amounts of grain. Both texts display a poetical structure in strophic alliteration. Parts of both texts are not well understood; some terms have been interpreted only in a preliminary way. It is conceivable that both blessings were meant to be recited to accompany agricultural rituals. In a region with very little rain, where cultivation is usually only possible with elaborate irrigation, a ritual focus on the soil is quite understandable. On the other hand, the high esteem in which agricultural activities are held in these texts is somewhat surprising as tilling the soil is usually viewed negatively in a Buddhist context. One Uyghur example explicitly describes several of these activities as “harming the true inner self of all the Buddhas in the three worlds.” 68

---

The Symbolic Level

If we leave the rather clearly defined realm of physical space, we may proceed to socially and symbolically constructed space. In several texts the land of the Uyghurs is mentioned. It can be imagined as a kind of holy land or as lying in the centre of civilisation. The Uyghur ruler is addressed in one poem as “oh our ruler, who was born in the centre (OU orta törümiş hanum(ı)z-a).” One poem speaks of the rewards for concentrating one’s mind on the Buddhas of the ten directions, the first of which is that “one is born in the Uyghur land, the centre realm (OU uygur elig orton uluştatugup b(ä)lgürüp).” Further on, a rebirth in the Tuṣita Heaven is mentioned. Even in modern scholarship the Uyghurs were characterised as ‘people of the middle.’ This is the relational aspect of the land of the Uyghurs. Periphery is imagined here as centre, a fact well known in spatial theory. The realm is threatened by enemies and other dangers. This is stated in the so-called Memorandum, a text of mixed prose and verse depicting the early phase of the West Uyghur Kingdom, which was committed to writing in the 13th or 14th century. Here, we find the interesting statement, “The holiest of realms is the realm of the On Uygur.” The conception of their homeland is very likely to be an essential factor in the construction of Uyghur identity. In line forty of this text, there is reference to the old sacred centre of the Turkic peoples in the region of Ötükän. Land and ruler are seen as complementary in this text. The place name Ötükän or Öṭikän is attested in other texts as well. The place name Kičig Öṭikän (Small Ötükän) found in one poetic text was probably relocated in the vicinity of Beš Balık—the summer capital of the Uyghurs—to remember the old sacred centre and to be in closer contact with a place imbued with charisma. Notice that despite the mixed population of the Tarim Basin, what matters is that the land belongs to the Uyghurs in a Uyghur perspective. Buddhas, bodhisattvas and protective deities can be invoked to help secure the well-being of the land and its inhabitants. One example is a

70 Ibid. (text no. 55:4).
71 Ibid., 183 (text no. 55:8).
72 Brose, “People in the Middle.”
73 Tieshan Zhang and Peter Zieme, “A Memorandum About the King of the On Uygur and his Realm,” Acta Orientalia Academiae Scientiarum Hungaricae 64.2 (2011): 142 (line 36; OU eltä idoki on uygar eli ök ãrmış).
75 Peter Zieme, “Toyn körkülg,” 15 (line 5).
praise of Maitreya recently edited by Yukiyo Kasai⁷⁶ and re-examined shortly afterwards by Peter Zieme.⁷⁷ In this highly difficult poem, which displays a peculiar imagery, Maitreya is asked to eradicate ailments and sufferings of the Uyghur people in the realm of Kočo.

There is one poem found in Yarkhoto which is a praise of the Uyghur realm.⁷⁸ Coming back to the Memorandum, the term Ten Uyghurs (OU on uygur) is of importance. It appears in the Maitrisimit as “the praised realm of the Ten Uyghurs.”⁷⁹ In other texts, we even find a fictive Sanskrit term, daśahaihura “Ten Uyghurs,”⁸⁰ and even daśahaihuramaṇḍal (as a term written in Brāhmī script which is the designation of the realm of the Ten Uyghurs).⁸¹ We do not know exactly to what extent the tribal organisation was still effective in shaping social life in the West Uyghur Kingdom, but it most probably was still meaningful even after the Uyghurs became sedentary in the Tarim Basin, not only on a symbolical level. By using an Indian term, daśahaihura, the prestige of the Sanskrit tradition is transferred to the Uyghur realm in Central Asia. The “blessed and holy land of the Ten Uyghurs” is mentioned in a Manichaean hymn as well.⁸² The notion of centrality⁸³ is evoked in a wall inscription by the two Uyghur monks Dharmasrī (d.u.) and Taypodu (d.u.), which bears the title sukavadi ulušnuŋ okıṭıgı [Invocation of the Sukhāvatī Land]. It is one of several inscriptions on a wall painting with scenes from hells:

⁸³ On the image of the centre in the history of religions see Gehlen, “Raum,” 394–395.
look, in this cella (of the) monastery\textsuperscript{84} which is nothing less than the pillar of the land of the Ten Uyghurs look in this excellent monastery gorge.\textsuperscript{85}

6 The ‘Embodiment’ of Sacred Space

In spatial theory, the human body is identified as “the source of ‘space.’”\textsuperscript{86} It is seen as the key to concepts of orientation. In some Uyghur Buddhist texts translated from other languages, we can detect this idea as well. A telling usage of two metaphors is found in chapter 11 of the work \textit{Maitrisimit}. The moment of conception in the case of the Bodhisattva Maitreya is described as first leaving the Tuṣita palace and then “entering the darkness of the womb of queen Brahmvāti.”\textsuperscript{87} In the same chapter, queen Brahmvāti approaches a rose-apple tree to give birth to Maitreya. At this very same spot grew the aśoka tree under which Śākyamuni was born. And then a second metaphor is found: “At this very same sacred place\textsuperscript{2} did the god of gods, Buddha Kāśyapa, Buddha Kanakamuni, and Buddha Krakucchanda leave the palace of (their) mothers’ womb.”\textsuperscript{88} The presence of the bodhisattva transfigures his mother’s womb, otherwise perceived as a place of darkness and despair, into a receptacle of the holy.\textsuperscript{89} In the 26th chapter of the same text there is a damaged passage which contains a description of the cosmological Buddha. In this case it is King Siṃha

\textsuperscript{84} The term \textit{manistan} usually but not exclusively refers to a Manichaean monastery.

\textsuperscript{85} BT XIII (text no. 59:2–5):
\begin{verbatim}
una bo manistan özäntä
on uygar el uduşnuŋ
ugrayu soka basrokı
una bo ništa aryadan kısılta
\end{verbatim}

\textsuperscript{88} Chapter 11, folio 8, verso 16–20. Geng, Klimkeit, and Laut, eds., “Erscheinen des Bodhisattva,” 328–329 (OU \textit{ol ok kutlug yer oronta t(ä)yi r(tä)yrisi kašip burhan kanakamuni burhan kr(ä)kaşunde burhan [ö]g karnlag vimanıntın ünä y(ä)rlkaddar}).

\textsuperscript{89} Ibid., 318.
observing the four continents and other auspicious marks such as bejewelled *kutāgaras* on the back and haunches of Maitreya.90 It is possible that passages such as this one and lists of the thirty-two *lakṣaṇas* were used to visualise in meditative practices. Note that the *Maitrisimit* is one of the earliest Old Uyghur Buddhist texts. It was translated from Tocharian A into Old Uyghur probably in the 9th century. After the classical period in which translations from Chinese prevail, a new phase in Uyghur Buddhism began with the advent of Tibetan Buddhism in the late 13th century. The need for translations from Tibetan arose and new rituals and their accompanying *maṇḍalas* and texts began to spread. The appropriation of Tibetan Tantric literature was seemingly rather selective, to judge from the texts identified so far.91 In a *Cakrasaṃvarasādhana* translated from Tibetan by Puṇyaśrī (d.u.) in the 14th century, there is an enumeration of the twenty-four spots of the body where the *vīra* and *yoginīs* reside.92 They correspond to the twenty-four outer places, such as Pulliramalaya, Jālandhara, Oḍḍiyāna, Arbuta, Godāvari and so on. Thus, the body is envisaged as sacred space, with visualisation as a kind of inner pilgrimage.

7 Concluding Remarks

Through a philological examination of the complex issue of sacred space in Uyghur Buddhism, it has become clear that concepts developed in other Buddhist traditions of the area are adapted and reformulated, whereas others are connected with the Uyghurs’ self-perception. They reflect how the Uyghurs positioned themselves within the Buddhist community and how they established their identity. In this respect, we can detect an intersection with the topic of ‘legitimation,’ which is discussed with reference to Uyghur Buddhism by Yukiyo Kasai in this volume. It is fortunate that Uyghur poetry has received a lot of attention from scholarship. Without our knowledge of poems, inscriptions and other original compositions, the Uyghurs’ take on sacred space would look exceedingly derivative. Although references to the topic are more often than not rather sketchy, they nevertheless contain important information that provides direct insight into Buddhist life in the Tarim Basin on an individual level, aside from authoritative texts.

91 The most substantial contribution to the study of Tantric texts in recent years, comprising several new identifications, is BT XXXVI.
